

**PRESS  
RELEASE**

**MARCO'S COMPLETE FILTRO RANGE ON SHOW AT CAFFÈ CULTURE**  
*Caffè Culture 2008 – Stand E40*

Following the successful launch last year of the **Filtro Shuttle** with thermally insulated, removable urns, the Filtro range of small and medium batch filter coffee brewers from **Marco Beverage Systems** is now complete. The range, which also includes the Filtro Pour Over machine and the Filtro Flask model will be on show on the **Marco stand [E40] at Caffè Culture 2008**.

**FILTRO RANGE**

Marco announced the launch of the first model pour over machine in the range, the Filtro filter coffee maker (image), three years ago. Since then it has become one of the most popular small batch brewers on the UK market. It brews coffee into 1.8 litre glass jugs, keeping them up to serving temperature on a hotplate.

That first introduction was followed by the Flask model (image) which makes coffee directly into insulated airpots of 1.9 to 2.2 litre capacity. Both Pour Over and Flask models are available in plumbed or manual fill versions.

The most recent innovation to carry the Filtro brand name is the Filtro Shuttle. This has a capacity of six litres full brew with half brew facility, brewing coffee directly into a thermally insulated removable urn. It offers caterers the benefit of being able to store and serve coffee at the correct temperature and quality at remote locations

within conferencing, hotels and offices –in fact, anywhere where there is a need for a self-service operation. The Shuttle has been designed as a high quality, flexibly programmed brewer specifically to brew coffee to Gold Cup standard, which is the new quality accreditation for filter coffee recently introduced by the Speciality Coffee Association of Europe (SCAE).

The Filtro range complements Marco's existing range of volume bulk brewers, the Qwikbrew and Maxibrew, which have for some time now been benchmark machines for caterers looking to serve coffee in volume and which may also be seen on the Company's stand at Caffè Culture.
